Pfizer Whistleblower Leaks Documents Proving Pfizer was Secretly Manufacturing the Deadly Drug REMDESIVIR

2ND SMARTEST GUY IN THE WORLD

Subscribe

Dr. Fauci and his partners-in-crime all knew that Remdesivir does nothing whatsoever to prevent or attenuate or in any way treat a respiratory disease, but they all knew full well as per the disastrous Ebola trial that this deadly drug would rapidly induce renal failure.

When they deliberately pushed intubation as a PSYOP-19 hospital protocol, they also all knew full well that the **fluids rising up through the lungs from the Remdesivir-caused kidney failure would in turn be pressurized by the ventilators in a fatal combination protocol therapy** which could then be easily classified as ***“death from COVID pneumonia.”***

Now we have proof that the maker of the slow kill bioweapon injections was also behind this democidal hospital protocol that drove the excess mortality higher such that they could leverage these associated deaths to **get far more Modified mRNA “vaccine” servings into the populace.**

This additional evidence further establishes that the “pandemic” Crimes Against Humanity were carefully orchestrated by a select few players that knew precisely what they were doing all along.

Do NOT comply.

Before getting to the damning receipts proving that Pfizer was always behind the manufacture of the deadly drug Remdesivir, here is proof that our whistleblower is in fact who she says she is:

Pfizer badge:

Résumé (picture and address redacted, and the surname updated since her recent marriage):

PROFILE

Hello, I'm Melissa McAtee. A previous Quality Auditor with a passion for honest work. I have been raising my son since my employment ended at Pfizer. But now I am wanting to get back to work and hopefully find a new career. I've worked several jobs short term before Pfizer, including restaurants, client care, and pro-life organizations.

I am honest, passionate and love working with people with the same values in the workplace as I do. Quality, integrity and efficiency are very important to me. I make little to no mistakes at my jobs, which is how I was promoted to Quality at Pfizer. I have an eye for detail and an ability to get things right the first time.

MELISSA MCATEE

EDUCATION

McPherson High school

Graduated in 2011

Hutchinson Community College

Psychology Major 2011-2012

WORK EXPERIENCE

Operation Rescue

Briefly worked for a pro-life organization in the Spring of 2022.

Pfizer Pharmaceuticals

From October 2012- October 2021

I was a Manufacturing Quality Auditor from April 2017 until 2021. My duties included daily paperwork, approving line operations, inspection of product manually, making sure all rules and protocols were being followed, did charting data and other quality responsibilities. Before Quality, I was a production assistant. Those duties included being the final observer of a product before being sent to customers, documentation, packaging, clearing out rooms of foreign materials and sanitation work.

Disability Supports

2011-2012

Took care of mentally disabled people in their homes and providing daily living care for each client. Due to being hired by Kelly Services to work at Hospira/Pfizer I left.

SKILLS

Attention to detail
High Integrity
Communicates well with others
Quick to learn

Some backstory on how Pfizer was able to clandestinely manufacture Remdesivir is in order before disclosing the evidence:

Hospira was an American global pharmaceutical and medical device company with around 19,000 employees before it was **acquired on September 3, 2015 by Pfizer**. Pfizer would then go on to **use Hospira as a front company** for their various shadowy dealings, not limited to Remdesivir.

Our whistleblower described the Hospira/Pfizer scheme as follows:

Yes, they still would put Hospira labels on things. But Pfizer bought Hospira in 2015. Pfizer wouldn't put their label on it, we would send it out made, but not labeled and **Gilead would put their label on it.**

The proof:
